

You are as ineffective as you are connected to the exuberant racket.¹

Narcissist Activism	Constructive Change
Feeds the ego; filled with outrage, moral correctness.	Feeds the community; changes the calculus of cost.
A metaphorical crowd charging shouting “Freedom”	An metaphorical Sniper ² acting and disappearing
Mostly Reactive, lacking a broad goal or plan of attack, a lack of vision, hammer looking for a nail	Mostly Proactive, focused, motive is very clear, leadership is unequivocal in the goal, a hammer striking a nail
Points out that nuclear waste last forever, natural gas is not much cleaner than oil, coal dirtier, hydro dams stop free flowing rivers, always a criticism, not aware.	Going from Coal to oil to natural gas to nuclear was done not because of the increase in cleanliness but rather to save money, deep understanding of the nature of change.
Religious revival, activism, protesting, punitive solutions	Reconstruction, Reorganization, Creative solutions
Technical innovation ³ , improved efficiency ⁴	Root cause analysis ⁵ followed by an effective corrective action
Working hard	Working a plan

-
- 1 Social Media is monitored and manipulative media your role in the Meta Data is to be predicted and manipulated.
 - 2 Violence tends to beget violence, all effective organizations have a functional aspect and an enforcement aspect, strength does no spring from passivity nor violence but attention to detail. Which is why you do not revolt, the threat of inevitable incarceration. You can run but you cannot hide. They always get their man. If you are effective be prepared to receive the violence of the owners of capital, the 1%.
 - 3 Our problems are not technical but ethical, technical solutions are always going to be narcissistic in nature because the innovator all too often is looking only to enrich themselves. Innovation will work until it does not. System collapse builds slow; then it’s very fast.
 - 4 Improved efficiency worked well when resources were limitless and the human population was less than 2 billion, today it only exasperates the inevitable crash, the last days will be boom days, That is the nature of an exponential growth scenario.
 - 5 Root Cause Analysis reveals overpopulation and tax law as the underlying problems. Tax law ; the rules of the game, population is the piece of the pie. With a long view, in a closed system, above a few billion the pie does not get bigger no matter how much you innovate.
